## DETAILED ACTION

### *Response to Amendment*

#### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1: "...wherein the pressure and temperature in the chamber are always less than the critical pressure and temperature of the solvent..." in claim 1 is new matter that was not in the specification as originally filed.

The examiner notes that "always" has been added by amendment, and the examiner considers this term to be new matter.

The applicant is requested to cancel new matter.

Art Unit: 1762

The applicant has argued that paragraphs 5 and 18 support this because the coating is formed through evaporation. However, claim 1 does not claim evaporation as part of the method. And the specification does not mention supercritical or critical pressure or temperature anywhere.

3. The rejection of Claims 10-20 under 35 U.S.C. 112, first paragraph, (“...wherein the coating is formed on the device through evaporation of the solvent...” as new matter) is withdrawn because of the amendment filed 6/8/2007.

4. The rejection of Claims 4, 13, 25 and 34 under 35 U.S.C. 112, first paragraph (enablement/solvents) is withdrawn because of the amendment filed 6/8/2007.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. The rejection of Claims 1-22, 24-25 and 27-39 under 35 U.S.C. 112, second paragraph, is withdrawn because of the amendment filed 6/8/2007.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. The rejection of Claims 10-22, 24-25 and 27-39 under 35 U.S.C. 102(e) as being anticipated by Mehta et al. (US 2002/0051845) is withdrawn because of the amendment filed 6/8/2007.

Mehta teaches a process for coating stents with a smooth coating (paragraph 16) in which a polymer is dissolved in a solvent that contains a therapeutic agent (paragraphs 7, 8). The solvents and the therapeutic agents are the same as claimed by the applicant (paragraph 43, claim 4). The pressure is taught to be 70 to 25 bars (greater than ambient pressure) (paragraph 36).

Art Unit: 1762

However, Claims 1-4 and 8-9 will be rejoined into this rejection when the new matter is removed from claim 1.

***Response to Arguments***

The applicant has argued that the solvent of Mehta does not evaporate. However, claims 1-4 and 8-9 do not claim an evaporation process.

The examiner agrees with applicant that Mehta does not teach formation of a coating through evaporation of solvent as in claim 10, spraying as in claim 21 and elsewhere, or selection of pressure based on VP of the solvent.

***Allowable Subject Matter***

9. Claims 10-22, 24-25 and 27-39 are allowed.

The reasons are outlined in response to arguments above.

**Conclusion**

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1762

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
